

Embryo Transfer Testimonials

Julie Erickson
NBHA World Finalist

“We are so excited for the upcoming foaling season. TCVH is a wonderful facility and we are very pleased with their embryo transfer program. The staff’s knowledge, professionalism, and service was outstanding. Thank you for taking the time and explaining the process. We look forward to our *Manors Nick Bar* x *Gee Whizz* Gypsy babies.”

Brian Ellsworth
AQHA Judge, Trainer, Breeder

“I have been working with the staff at TCVH for all my veterinary needs since 2006. I have found them to be highly professional, extremely competent, and excellent to work with.

I had a mare at another reproductive facility for 2 years, with no success. After I brought her to TCVH, we harvested 2 embryos, resulting in 2 foals in the first 3 flushes.

Since 2008, when TCVH started doing embryo transfers, we have had a 76% recovery rate. I am extremely pleased with these results. I would highly recommend TCVH to anyone looking for an excellent equine reproductive veterinary clinic.”

Bob and JoAnn Manor
NBHA World Finalist ,MBRA Champion

“We came to TCVH because we wanted to get a foal out of our great barrel racing mare, *Little Super Bug* and also an embryo, while she was still productive. We had tried two other veterinary facilities, and neither attempt produced an embryo or foal. At TCVH we had success at last! That success has been repeated successfully each time with *Little Super Bug*, and also with our other barrel racing mare *Romances French Gem*. At TCVH, they know what they are doing!

Since that was so successful, we decided to have our breeding done at TCVH as well. We ship semen from TCVH from our Stallion *Manors Nick Bar* and have also done on-site breeding; also with great success. We are fortunate to have such knowledgeable veterinarians and such a wonderful facility in our area.”
